UNC Charlotte Master of Health Administration

Our **MISSION** is to prepare students to improve the public's health by managing health care organizations.

We **VALUE** intellectual rigor, innovation, teamwork, mentoring, professionalism, ethical leadership, diversity, personal integrity, life-long learning, and personal growth.

We pursue our mission and values through education, research, and service to:

Provide qualified and motivated students with the knowledge, skills, and abilities that enable them to become health service administrators or policy analysts.

Contribute to the body of knowledge related to health care management, improvement of the delivery of health services, and the development, implementation and evaluation of health policy.

Provide assistance and advice that contribute to improvement in the efficiency and effectiveness of practitioners in the field, and the practice of health service administration in organizations and health related institutions.

UNC CHARLOTTE

Master of Health Administration

Department of Public Health Sciences, College of Health and Human Services

Why Choose a UNC Charlotte MHA?

Trends in health care management point to a future of rapid change confronting managers in new and diverse health care delivery settings. According to the U.S. Bureau of Labor Statistics, medical and health services managers earned an average of \$103,608 in 2014, with those practicing in general medical and surgical hospitals earning significantly more.

Our grounding in the Department of Public Health Sciences prepares and positions our students for the impending shift to population health.
